

LED T8 2FT

10W

> Features

- Environmentally Friendly: Uses up to 80% less energy than fluorescent tubes
- High Quality Materials: High-output LED chips and high-quality plastic which excellently transmits light.
- Safe and Stable: Mercury free, safe plastic build, no UV or IR radiation
- High Quality Lighting: High CRI, fast response, no flickering, low glare.
- Attractive look: Modern, clean design

* PF: ≥0.95; Base: G13; LED Type: SMD 2835 LED; Material: PC + Pure Aluminum Heat Sink
* 2ft 10W T8 tube are UL&DLC certified, 3ft 14W T8 tube are UL certified.

> Dimensions (Unit: inch)

> Installation

UL certified LED tube has a single end input, the other side is unpowered. When wiring, the live wire and the null wire both connect to the power supply side, while the other side is not connected to the line. Wiring schematic.

Installation:

When rewiring the circuit, the live line connects to the "L" pin, the null line connect to the "N" pin (refer to schematic).
