

FIELD LED 800™

SPORTSBEAMS
LIGHTING UP THE SPORTS WORLD

NO GLARE

Athletes can see the action with our lights. Our single, glass optic lights every playing surface evenly with smooth, clear light.

90,000 LUMENS

The Sportsbeams Field LED 800 delivers a powerful 90,000 lumen beam efficiently and with significant control.

BI-COLOR TECHNOLOGY

Our Bi-Color LED 800 option operates in a temperature range of 2,700k to 6300k within the same fixture.

BROADCAST QUALITY

Our founders are experts in broadcast lighting (just ask Emmy®). They've put their years of expertise into our stadium lights so every uniform looks as good on TV as it does live.

ACTIVE COOLING SYSTEM

Our patented active cooling system reduces our weight fixture by over 40%, maintains constant 70 °C internal temperature, and allows for any mounting angle in more extreme environments.

ADVANCED INTELLIGENCE

Each Field LED 800 is equipped with serious intelligence. It tracks lighting hours, fan speed, heat, output and more. Armed with its own MAC address, each light can be controlled individually or together.

KEY FEATURES:

- 800W LED illumination
- 90,000 lumens delivered
- No plastics used in the light path
- Ethernet connectivity for wireless or wired DMX control
- Glare-reducing, patented single glass optic for even field lighting
- High 90+ CRI color fidelity option
- Instant re-strike and dimming down to 1 watt
- IP-66 weather-tight housing & system
- Patented active cooling provides multiple levels of protection
- 100,000+ hour rated LEDs
- IP-67 proprietary power supply with surge protection

DECADES OF BROADCAST EXPERIENCE

Our founders' extensive technical achievements of Sportbeams Founders include Emmy® Awards for LED lighting technology "so innovative in nature that they materially have affected the ...recording of television."

After leading the LED revolution for television and motion picture lighting for over a decade, including lighting major sporting events, television and sports broadcast studios, they bring their technological wizardry to the Sportsbeams Field LED 800™.

RELEVANT TODAY RELEVANT IN 20 YEARS

Every light we produce has the built-in intelligence to provide years of worry-free, multi-option performance for years to come.

- ★ No plastics in the light path. Any outdoor fixture that uses plastic lenses will experience significant light loss over the years.
- ★ IEEE 802 MAC address and built-in ethernet port for multiple communication options (wi-fi, DMX).
- ★ 2-way communication for monitoring light status and recording events.

Our high-quality light fixtures are covered covered by one or more of the following certifications:
